

What will you do with donations beyond the 30 K goal?

I have never heard this question until now when we are on the brink of MEETING OUR GOAL:

It is a true blessing that God brought us this far, and He will lead us through from here! Please don't stop because we are almost there! I have never heard of a game being over because a player surpassed a personal goal in their game, or of a team ending a game because of exceeding the goals placed on them for that game!

We will prayerfully budget for our fiscal year from what we have been given. Then we prayerfully begin to plan for the next step. For the Crossroads Pregnancy & Parenting Center, that will be preparing volunteer staff with training and resources to respond to those in crisis with a pregnancy with compassion, hope, and encouragement.

What are the costs involved with running a pregnancy resource center?

We are committed to being careful with every dollar. This is why we deeply appreciate every donation regardless of size. With exception to some specialized services, most everything we do at Crossroads is provided at no fee because to be effective, we need to be there regardless of their ability to pay. This means that funds to cover every expense, from wages, to mileage, to office supplies, to resources, professional fees, and direct time have to be generated through donations.

As we grow, paid staff will be the area we first tend to, as to be effective, we need to spread some of the current additional duties on any one person to other helpers. This would involve growing administrative staff, clerical & support staff, professional helping staff, and professionals to assist with development and relations in the area.
